

SCALAMID

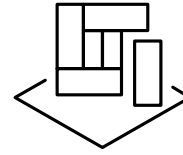

Fibre cement facade materials

www.equitoneturkiye.com

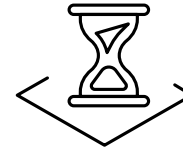

5 compelling reasons to choose SCALAMID for your project

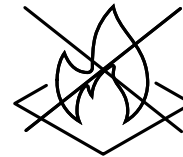

Customized prints and colors

Our range is in line with the main market trends and available with short lead times and low minimum order quantities. Panels are available in standard colors and looks such as wood, stone, concrete and rust. They are fully customizable, accommodating any size, shape, perforation, milling, printing and unique applications and layouts. Custom colors, designs and images can be printed for endless possibilities with short lead times.

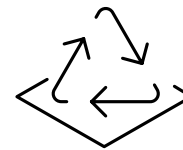

Durability & quality

Durable material with 50+ years of longevity, a long lasting warranty, anti-graffiti protection on Design collection. The panels are resistant to extreme temperatures, chemicals, UV and various living organisms.

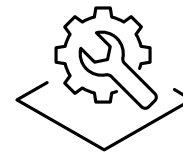

Safety

The material is non-combustible, preventing fire ignition and spread. It has an EN12467 Class 4 strength classification, with no harmful gas emissions

Sustainability

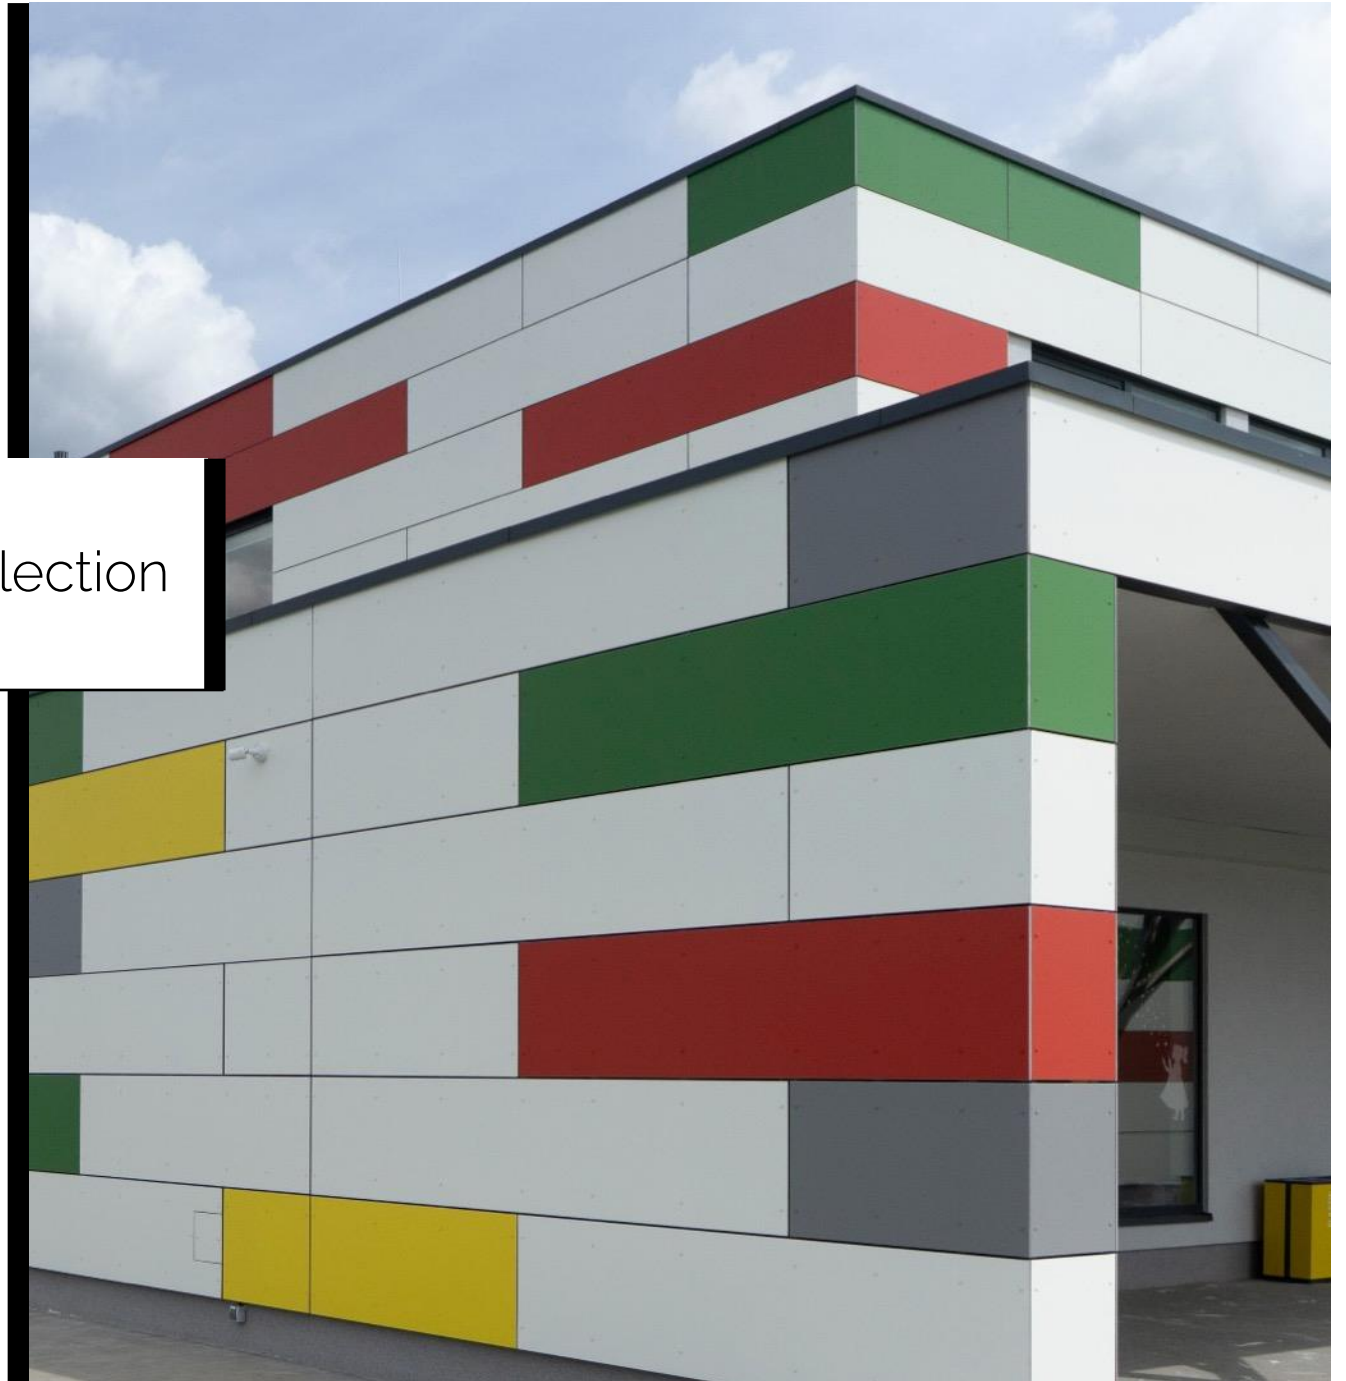

Fibre cement panels are resource efficient by nature. They are thin, lightweight and modular and they are easy to add, remove, adapt, replace and dismantle for recycling.

Expert services

Scalamid is now part of Etex Group, global company with more than 120 years of experience in fibre cement production. Expert advice is available at every stage of the project.
